- each horizontal wire is waved to drain water
- each horizontal wire is a tension wire
- edge wires are doubled to increase the strength of the net
- the superior posts for the PILONET® system are those with the PILCLIP® assembly strip, which have a profile on the surface for anchoring mesh
- the PILONET® system can be supplemented with a wide variety of high-level single swing gates, gateways and sliding gates
- service life of 10 years guaranteed

USE: sports stadiums, industrial buildings, public areas, factories and warehouses...
